

Press Release

Internet & Idee partecipes on Cyber Security World Asia, the award-winning global cybersecurity event

The event – will be held from 12 to 13 October in Singapore (Marina Bay Sands) - is among the most important in the world and brings together cybersecurity experts and business manager with stakeholders, solutions and services to accelerate digital transformation processes

Cosenza, 07 October 2022

Singapore Tech Week will host an overwilde public of medium-large companies that include thousands of experts and executives of companies related to cybersecurity, an opportunity to promote and support the exchange of know-how and experience, make synergy and expand its business in new international markets.

Internet & Idee will be present at the event with a team of ten people and, in fact, will be the only Italian company among the hundreds of participants, together with world leaders in the sector, innovators and excellent relators in the field of Cyber Security and Data Protection.

Internet & Idee, works with a specific Cyber Security unit composed of a qualified team with interdisciplinary skills to predict and avoid the most sophisticated cyber attacks; thanks to consolidated models of security assesment.

The Security Operation Center of the company is able to assess the degree of protection of corporate information systems against typical vulnerabilities, identifying any critical - ordered and prioritized - suggesting all actions to introduce the defenses to avoid possible attacks and to prepare an effective incident response plan.

"Taking part to the Cyber Security World Asia represents a great opportunity for Internet & Idee to confront with international company, present our services and expand the reference market in the APAC area" - said Carlo Stumpo, Founder & CEO
